

PacHacks

Sponsorship Prospectus

23 November 2019 - 42 Silicon Valley

What is PacHacks?

PacHacks is a 14-hour, student-run hackathon held at 42 Silicon Valley in Fremont, CA. High schoolers attending this event will be able to develop their programming skills and bring their ideas to life. This event is aimed at all students – from novice hackers to the most experienced ones, and we will have workshops and mentors available to assist hackers in creating the project of their dreams.

Why sponsor PacHacks?

Sponsors of PacHacks will be able to access valuable information about attendees, and will also gain the opportunity to demonstrate their products and APIs. As a result, sponsors will get more publicity and have more hackers using their products. Sponsors can also distribute swag, which will increase brand awareness and recognition.

How will your money help?

Your tax-deductible donations (processed through Hack+, a 501(c)(3) organization) will go towards venue costs, food, prizes, and swag. This will help make the event free for anyone! You can also sponsor meals or send mentors and judges.
